SPACE STILL AVAILABLE IN NEW RIVER PIPE FITTING, BLUEPRINT READING, MATH CLASSES

[LEWISBURG, W. VA.] It is not too late to enroll in three exciting new classes in the Machine Tools Technology Program on the Greenbrier Valley Campus of New River Community and Technical College in Lewisburg, W. Va.

Donovan Rhodes, visiting instructor of Welding, reports that there are still openings in Welding Blueprint Reading, Math for Industrial Trades and Pipe Fitting classes. He adds that machine shop classes in milling and lathe operation are also available.

“These classes are open to the general public or for businesses that want to send their employees for retraining or upgrading their skills,” he said.

The math class is a co-requisite of the pipefitting class, meaning that they both should be taken at the same time. The others can be taken as stand-alone classes.

For information on this and other programs of study offered at New River Greenbrier Valley Campus, telephone (304) 647-6560.
